

Organic and residual waste is disposed of in underground waste containers using a **special access card** received by every household and business.

No card is required to dispose of paper, glass and waste packaging, as these can be discarded freely through openings in the deposit columns.

The actual number of monthly disposals of residual and organic waste is billed, but no fewer than six disposals for residual waste and eight for organic waste.

The monthly cost is calculated in accordance with the applicable pricelist (www.vokasnaga.si/odpadki/ceniki).

How do you use your card to deposit organic and residual waste?

1. Place the card on the reader next to the cover of the bin.
2. The cover opens when the card is read and verified.
3. Drop the waste bag into the opening and close the cover.
4. Repeat the process if you have more bags. The largest bag size is 40 litres.

Please report any difficulties or complaints immediately or as soon as possible by calling our toll-free number **080 98 82**. Please check the messages displayed on the reader.

The card contains a chip, so it should not be folded or punched. Cards are unique to each individual user (household or commercial user).

Overview of disposals

You can check the number of your disposals via a special app available at www.vokasnaga.si under Odpadki/Zbiranje in odvoz odpadkov/Podzemne zbiralnice.
